

Interview Task — AI/Backend Engineer

AskFirst · Clary Team | 60 minutes | Any tools (Google, AI, docs OK)

What You're Building

A mini AI chat app — Streamlit frontend + FastAPI backend + SQLite database

- Chat with an LLM (OpenAI / Gemini / Groq — your choice)
 - Create multiple chat threads
 - Switch between threads and see full message history
 - Universal memory — start a new thread and the AI still remembers past threads
-

Stack

FastAPI · Streamlit · SQLite (SQLAlchemy) · Any LLM provider

Submit

- main.py
- app.py
- database.py
- requirements.txt + .env.example
